Research Interests

Multi/Biculturalism: Personality and socio-cognitive factors involved in the management of multiple cultural socializations and identities; Individual differences in bicultural identity structure; Biculturalism, bilingualism, and social-networks; Consequences of biculturalism (social, cognitive, and adjustment-related).

Culture and Personality: Identification and measurement of culture-specific and -general personality constructs; Interplay of cultural values and personality in predicting wellbeing; Bilingualism and personality self-schemas.

Cross-cultural research methods: Cultural/linguistic issues in instrument development and adaptation; Combined emic-etic methodology; Cultural/linguistic issues in psychological assessment.

I investigate the above issues with multiple methods, which include experimental, correlational, and longitudinal designs, with multiple types of data, such as self-report, behavioral, and social network data, and with diverse types of samples.
